**Senior Quality Assurance Engineer | Software Testing | AWS & Azure Test Environment Management**

---

## PROFESSIONAL SUMMARY

Senior Quality Assurance Engineer with **more than a decade of experience** in software testing across enterprise, web, mobile, client-server, and cloud applications. Strong expertise in functional, integration, regression, system, security, compatibility, performance, and production testing, with hands-on experience managing AWS and Azure test environments, including provisioning, configuration, upgrades, maintenance, and troubleshooting. Experienced in managing large-scale cloud environments supporting QA, Support, SRT, Performance, Beta, and customer POC teams. Strong background in Agile and Waterfall methodologies, SDLC/STLC, SQL Server, Jira, Jenkins, Docker, Kubernetes, and cross-functional collaboration to deliver high-quality software releases.

## CORE COMPETENCIES & TECHNICAL SKILLS

### QA & Software Testing:

Manual, Functional, Integration, System, Regression, UAT, Security, Compatibility, Performance, Load & Stress, Installation, Migration, Localization, Production, Exploratory, Web & Mobile Application Testing

### Test Management & Methodologies:

Test Planning & Strategy, Test Case Design & Execution, Defect Management & Tracking, Test Reporting & Metrics, Requirement Analysis, Root Cause Analysis, SDLC, STLC, Agile, Scrum, Waterfall, BDD

### Cloud & DevOps:

AWS, Microsoft Azure, Cloud Test Environment Management, Environment Provisioning & Configuration, Docker, Kubernetes, Jenkins, Git, GitHub

### Tools & Databases:

Jira, TestRail, ALM, SQL Server, MongoDB

## WORK EXPERIENCE

**Senior Quality Assurance Specialist II | Jun 2019 – Oct 2024**

**SOTI Inc., Mississauga, ON**

- Managed **130+ AWS and Azure cloud instances** supporting QA, Product teams, Support, SRT, Performance, Beta, and customer POC environments, including provisioning, configuration, maintenance, and troubleshooting.
- Performed **installation, migration, and upgrades** across test, production, and customer environments, validating application functionality and environment readiness.
- Provisioned and configured QA environments for cross-functional teams, including instance modifications, security configurations, memory enhancements, and port adjustments.
- Administered **product license databases and registration keys** across test environments, ensuring accurate licensing and environment configuration.
- Conducted **daily production sanity testing across multiple regions**, identifying critical issues and providing detailed validation reports to stakeholders.
- **Troubleshoot customer environments**, analyzed application and database logs, and used backups and environment replication to reproduce customer issues for development and QA investigation and resolution.

- Supported **customer-specific pre-release and mid-release patch builds**, performing sanity testing and validating customized fixes before providing builds to customers.
- Generated test data for **performance testing** and performed database backups and restorations to reproduce and investigate application issues.
- Conducted **compatibility testing** across SQL Server versions, operating systems, device platforms, and multiple device models.
- Installed and validated agents across **Android, Windows, and enterprise device platforms**, verifying reliable device-server communication.
- Performed **integration, functional, regression, and security testing**, including SAML 2.0 identity-provider integration, with test case design, execution, defect reporting, and retesting.
- Participated in **requirements reviews, test estimations, test case reviews, and peer reviews**, collaborating with development and product teams to improve test coverage and product quality.
- Created QA training materials and **onboarded new team members**, sharing testing processes, tools, and environment-management knowledge.

#### **Associate Consultant / Test Lead & Product Technical Support Specialist | Aug 2010 – Nov 2018**

##### **Amtex Software Solutions Pvt. Ltd., Chennai, India**

- Led a **5-member QA team**, coordinating test activities, workload allocation, daily stand-ups, sprint planning, and progress tracking using Jira.
- Participated in **requirement analysis**, reviewed business requirements, user stories, and Jira tickets, and defined test scope and coverage.
- Prepared **test plans, test data, test environments, and requirement traceability matrices** based on client and product requirements.
- Designed and executed **functional, regression, integration, and UAT testing** across multiple projects and product releases.
- Performed **installation, security, NLS, performance, compatibility, and cross-browser testing** across Windows, Linux, and multiple mobile devices.
- Set up and maintained **custom application test environments** using web and application servers, including Tomcat, IIS, and WebSphere.
- Created and maintained **Apache ANT automation scripts**, analyzed test failures, and implemented corrective actions.
- Led **defect triage and peer review activities**, working with development and client teams to prioritize defects, track resolution, and complete retesting.
- Provided **product technical support to customers**, troubleshooting reported issues, researching solutions, documenting defects and non-functional requirements, and providing workarounds where applicable.
- Reproduced customer-reported issues in controlled environments and provided detailed findings to development teams for analysis and resolution.
- Supported **software releases, hotfixes, and customer-specific patches**, including UAT, sanity testing, and deployment support in customer environments.
- Prepared and communicated **daily, weekly, and monthly QA status reports, test metrics, defect reports, and release updates** to customers, product managers, and stakeholders.
- Created **training materials, help guides, and video tutorials** to support internal teams and customers.
- Collaborated with **cross-functional teams and customers** to clarify requirements, resolve technical issues, and ensure timely delivery of quality software.

#### **QA Engineer | Sep 2008 – Aug 2010**

##### **Navis India Technologies Pvt. Ltd., Chennai, India**

- Designed and implemented **test suites, test scenarios, and test cases** based on functional specifications, covering positive, negative, boundary, and edge cases.
- Executed **smoke, system integration, user acceptance, and performance testing** to validate application functionality, responsiveness, scalability, stability, and release readiness.
- Identified, logged, tracked, and verified defects using **Bugzilla**, ensuring timely resolution and retesting of fixes.

- Automated build and test processes using **Apache Ant** and integrated scripts with **CruiseControl** to support continuous integration and regression testing.
- Analyzed build and test results and prepared **test reports** for stakeholders, highlighting failures, issues, and test status.
- Automated repetitive testing tasks using the **SPARCS scripting tool** and performed ad-hoc testing on tagged builds.
- Participated in **peer and group reviews** of test plans and test cases to improve test coverage, quality, and adherence to standards.
- Conducted **interface and integration testing** with live host and third-party communication systems to validate data exchange and system interoperability.

#### **Software Consultant – Test Engineer | Nov 2007 – Aug 2008**

##### **Wipro Technologies, Chennai, India** (Deputed through Javaji System Solutions Pvt. Ltd.)

- Analyzed client requirements and developed **WinRunner automated scripts** to create quotes and policies, supporting functional validation of business workflows.
- Designed, reviewed, and executed comprehensive **test cases** based on client requirements and functional specifications.
- Performed **functional, system, retest, and regression testing** across multiple application releases.
- Executed automated **WinRunner test scripts** to support regression testing and reduce repetitive manual testing activities.
- Identified, logged, tracked, and retested defects using **Mercury Quality Center**, ensuring timely defect resolution.
- Conducted **cross-browser compatibility testing** to validate consistent application functionality across multiple browsers.

#### **ADDITIONAL QA PROJECT EXPERIENCE**

---

##### **QA Project Contributor – Volunteer | Dec 2025 – Present**

##### **Mazenet Solution, Coimbatore, India** (Remote)

- Contributed to QA testing of a **financial services software product**, including **requirements analysis, test case design, test execution, and defect validation**.
- Performed **functional, regression, integration, and UAT testing**; identified, documented, tracked, and validated defects in collaboration with the development team.
- Supported **release validation and production readiness**, contributing to the successful release of the product.

#### **EDUCATION**

---

- **Master of Business Administration (MBA) – Systems**  
Bharathidasan University, Tiruchirapalli, Tamil Nadu, India
- **Bachelor of Science (B.Sc.) – Computer Science**  
Nehru Memorial College, Tiruchirapalli, Tamil Nadu, India

#### **CERTIFICATIONS & PROFESSIONAL TRAINING**

---

- **INFO70247 – Cybersecurity: CompTIA Security+**  
6-Week Online Course, Sheridan College, Ontario, Canada
- **Generative AI & AI Agents in Software Testing – Certificate of Completion**  
Udemy
- **Certified Software Test Professional (CSTP)**  
Softsmith InfoTech Pvt. Ltd., Chennai, Tamil Nadu, India
- **WebFOCUS Certified Application Developer – Associate Level**  
IBI Staff (InfoBuild India), Chennai, Tamil Nadu, India
